STROKE ALERT
EMS STROKE PRE-NOTIFICATION PROTOCOL

Perform KBEMS Severity -Based Stroke Triage Algorithm for EMS

⬇

Determine appropriate stroke center destination based upon assessment.

⬇

Communicate with receiving facility (Dispatch Center/ Charge Nurse) immediately upon destination decision determined.

⬇

Communicate Essential Patient Information to Receiving Facility during initial report:

1.) Patient Name, DOB, Gender

2.) Last Know Normal Time

3.) Cincinnati Stroke Scale

4.) C-STAT Score

5.) Airway Status (Intubation, Oxygen Therapy)

6.) Blood Glucose

7.) Hemodynamic Status (HR, BP, ETCO2)

⬇

The above protocol for "Stroke Alert" should trigger a "Stroke Alert" activation at the receiving facility.
