

## Door to Device Subcommittee Meeting 12.14.2020

On the call: Amy Porter, Kari Moore, Lindsey Siewert, Ambra Gonzalez, Danielle Topliffe, Tina Walsh, Margie Campbell

Absent: Jane VanTatenhove

What is the immediate goal?

Are we identifying correct patients? Is process working smoothly?

Reducing door to device times? Meeting 50% requirement for TS Advanced Therapy award?

Reviewed GWTG Door to Device reports - currently at 30% - is 50% realistic to meet award goal?? **What about 10%? = 40% of TS Advanced Therapy measure - 24 hour window**

What other data do we want to look at - total number of ischemic strokes and number of patients with an LVO

How is COVID affecting Door to Device times?

Margie mentioned that intubation process has changed due to COVID (intubating in ED instead of IR)

Others agreed

Where is largest chunk of time taking place?

NBH - arrival at OR to groin puncture

UK - arrival to hospital to arrival at IR suite (due to intubation process)

Lindsey reported out on lit review results:

Found nothing ground breaking...use of clocks

### Next Steps:

1. **Everyone do an assessment of the process - Strength vs. Barriers for each time interval**
2. **When do we want to meet again? February and then every other month (Abby will send out Doodle poll to gauge availability for February meeting)**
3. **Abby and Lindsey will meet in January to review available data**
