

Agenda	Discussion	Actions
Introductions	<ul style="list-style-type: none"> • Megan Switzer introduced Nathan Kusterer to the group as the new Chair of Heart Systems of Care Subcommittee. Dr. Kusterer is a cardiologist at Baptist Health Lexington. • New members introduced themselves as follows: Kelli Conley, RTR (new STEMI Coordinator, UK; Rhonda Felty is in a new role); Sheryl Meador, Administrative Asst; KHDSP Task Force; Amy Osbron, RN, CP and Resuscitation Coordinator, Baptist Health Paducah; Crystal Spears, RN, Professional Development Specialist, Baptist Health Paducah, Jennie Morehead, Paducah, Wellness Director, HealthWorks <p>Note: Following the ZOOM meeting, 2 registrants notified me that they were on the call and could hear the meeting but couldn't see the content or share in the discussion. They will be counted as attending.</p>	
Overview of Kentucky Heart Disease and Stroke Prevention (KHDSP) Task Force	<p>Megan provided an overview of the KHDSP Task Force including the following:</p> <ul style="list-style-type: none"> • Chronic Disease Branch of Kentucky Cabinet for Health and Family Services • Strategies of the KHDSP • KHDSP Program Staff • KHDSP Task Force Mission(to improve cardiovascular and cerebrovascular health for all Kentuckians) and Goals • Structure- 2 chairs (Kerri Rimmel, MD, U of L, Neurology and Nathan Kusterer, MD, Baptist Health Lexington , Cardiology) • Steering Committee-the governing structure comprised of Task Force- Task Force Chairs, representatives from HDSP program, AHA and AHSA and EMS. • Committees include Advocacy, Kentucky Against Stroke and Heart Disease (KASH), Heart Systems of Care and Stroke Systems of Care 	
Dec 4, 2019 Meeting Minutes	<p>Megan stated the last KHDSP Task Force Heart Systems of Care Committee meeting was 18 months ago due to COVID. The Steering Committee has met several times via ZOOM.</p> <p>Megan briefly reviewed the December 2019 minutes including the need to adopt standard messaging for public education related to heart attack symptoms (these are included on the new website); Liliana Terziyska-Kuvlieva, MD, UK Quality, discussed the goals of ACC KY Chapter of NCDR Quality Collaboration; Reviewed Draft KHDSP Task Force Heart Systems of Care Strategic Goals; Need for increased participation in this committee (each attendee was asked to invite a representative from a hospital/EMS they work with to the next meeting).</p>	

Review of
2020-2023
Strategic Map
and Plan Heart
Systems of Care

Megan stated that the Strategic Plan is updated every 3 years. The Hearts Systems of Care Committee was formed to improve statewide cardiovascular systems of care. Due to the number of new participants she wanted to provide an overview of the 2020-2023 Strategies and Actions.

Objective: Update and Continue to Improve CV Systems of Care

Strategies

1. Identify and improve current heart systems of care
2. Engage receiving hospitals to work with its referral base to improve outcomes
3. Continue collaboration among healthcare systems and public health to standardize messaging
4. Continue to engage EMS in heart systems of care

DISCUSSION:

1. Megan recommended that we have more frequent Heart Systems of Care Committee meetings so we can accomplish our goals outlined in the Strategic Plan. She asked the group what they thought about monthly or bimonthly meetings. The participants decided that we should meet the end of June.

Strategy 1: Identify and improve current heart systems of care.

Strategy 1; Action Item 1:

Action Items

Identify and disseminate map of 24/7 ST-elevation myocardial infarction (STEMI) receiving facilities capable of primary percutaneous coronary intervention (PCI).

DISCUSSION:

1. We need to update the KY map for Primary PCI Receiving facilities. Alex Kuhn stated he would work on updating the map using certificate of need for PCI facilities data, Mission: Lifeline data and KBEMS.
2. Facilities that state they have PPCI capabilities but are not consistently available 24/7/365 continues to be a concern. A KBEMS STEMI Destination Protocol is available online that provides EMS with the option of bypassing a hospital if they do not have PCI capabilities.

Strategy 1; Action Item 2:

Promote dissemination and utilization of current guideline-based statewide STEMI protocols for rapid transport from non-PCI-capable

➤ Megan Switzer will schedule a Heart Systems of Care Subcommittee Zoom meeting for the end of June 2021.

➤ Alex Kuhn will update the KY state wide map with PPCI facilities who have 24/7/365 capabilities.

Respectfully submitted,

Megan Switzer, MSN, FNP-BC, CHFN-K, AACC

Megan Switzer, MSN, FNP-BC, CHFN-K, AACC
